PROFESSIONAL SUMMARY

Entry-level Java Developer with hands-on experience building full-stack applications using Java, Spring Boot, and RESTful APIs. Currently gaining enterprise software experience as a Programmer Analyst Trainee at Cognizant. Winner, Axis'25 Hackathon, VNIT Nagpur. Strong foundation in OOP, data structures, microservices, and AI-assisted development (Codex, Claude), with growing expertise in workflow automation using n8n.

SKILLS SUMMARY

Languages: Java, JavaScript, SQL

Java: OOPs, Collections, Stream API, Multithreading, Java 8

Backend: Spring Boot, Spring MVC, Microservices, REST APIs, JWT Authentication, Maven, Lombok, MongoRepository

Frontend: HTML, CSS, JavaScript, React.js, Redux.js, Tailwind CSS

Databases: MySQL, Oracle PL/SQL, MongoDB

AI Tools: Codex, Claude (AI-assisted coding & debugging)

Automation: n8n (Workflow Automation), REST/Webhook Integrations

Tools & Platforms: Git, GitHub, VS Code, Postman, AWS, CI/CD Basics, Vercel, Netlify

Professional Skills: Team Collaboration, Problem Solving, Decision Making

WORK EXPERIENCE

Programmer Analyst Trainee | [Cognizant](#)

March – July 2026

- Build and maintain interactive dashboards using SAP Analytics Cloud (SAC) for enterprise clients
- Collaborate cross-functionally with ERP systems to translate business requirements into data-driven reporting solutions

Frontend Development Intern | [InternPe](#)

Dec 2023 – Jan 2024

- Developed responsive web pages and the HostelDekho booking platform using React.js, HTML, CSS and JavaScript
- Enhanced UI/UX with responsive design patterns, improving mobile usability across devices

PROJECTS

NeuroFlex Rehabilitation System (Patent Approved)

Mar 2024 – Nov 2026

- Built a Java Spring Boot REST API backend for an IoT-enabled physiotherapy platform integrating an ESP32-based smart mat for real-time patient movement tracking
- Used MongoDB for data persistence and JWT-secured endpoints, powering an interactive web interface for clinicians to monitor recovery remotely

Shiva's Kitchen Mess Management Dashboard (Fullstack) [Live](#)

Apr 2024 – Feb 2025

- Designed backend REST APIs with Java, Spring Boot, and MongoDB to manage meal plans, subscriptions, and menus for a freelance client
- Built a clean, mobile-responsive frontend with efficient data flow, improving usability and dining experience

AI-Powered Sales Analytics & Auto-Mailer (n8n Automation) [Live](#)

June- July 2026

- Built an end-to-end n8n workflow connecting Google Sheets, Gmail, and a Gemini AI agent to automatically analyze data and generate insights
- Automated report generation and delivery by triggering Gemini-based analysis on new sheet data and sending results via Gmail without manual intervention

ACHIEVEMENTS & CERTIFICATIONS

- Winner – Axis'25 Hackathon, VNIT Nagpur (March 2025): built a full-stack MERN application competing against 50+ teams under time constraints
- MERN Stack Development – 30DaysOfCoding (2023): full-stack development course covering scalable web application architecture
- Backend Development with Express & Node.js – IBM (Coursera, 2023–24): RESTful APIs, middleware, and asynchronous programming

EDUCATION

B.Tech, Computer Science Engineering (IoT) | Yeshwantrao Chavan College of Engineering, Nagpur

2022 – 2026
